

Blythewood Middle School and Boys & Girls Clubs have partnered to bring you...

...a teen-focused after-school program located at the school

Students who participate in extracurricular activities achieve better grades, have lower rates of truancy, attain higher levels of achievement in college and feel more attached to their schools, as documented by a 17-year study that followed 1,800 sixth-graders in 10 Michigan school districts through high school and college. ([Michelle Galley. "Extra Benefits Tied to Extracurriculars" Education Week, October 18, 2000](#))

---
