WHAT IS R2i2

- R2i2 is not a “High School”, but rather a learning and innovation center for high school students
- R2i2 supports the existing five high schools in Richland Two by providing additional classes and programming not available elsewhere in the district
WHAT IS R2I2?

- R2i2 is an innovation-oriented institute where entrepreneurship and leadership are themes that permeate all we do
- R2i2 is a community center where portions of the building will be accessible to the public. The Richland County Public Library and Adult Education programs are two possible access points for our community
WHAT IS R2I2?

- R2i2 is an organization that works closely with businesses to make sure we are providing course work that meets with the demand of a changing economic environment.

- R2i2 is for all students! While some may take classes, others may participate in one of the many other ways that R2i2 will reach out to students.
INITIAL CURRICULUM - 2 CREDIT UNITS

- *Advanced Hospitality Arts*: Mobile and Non-Traditional Food and Service Businesses (160 minutes)
- *Managerial Business*: Managerial Accounting and Finance (160 minutes)
- *Supply Chain and Logistics*: Supply Chain and Global Logistics Management (160 minutes)
- *Advanced Manufacturing*: Computer Aided Design and Manufacturing (160 minutes)
INITIAL CURRICULUM - 1 CREDIT UNIT

- *Advanced IT*: Apple App Development (78 minutes)
- *Advanced Engineering*: Next Energy and Fuel Cell Engineering (78 minutes)
GRADING

- Mastery Grading
- Multiple opportunities for mastery (mastery vs. practice)
Student Think Tank, Innovation Incubator, and R2i2 Business Ventures:

Student Think Tank:

A student organization that performs research and advocacy concerning topics such as social policy, political strategy, economics, military, technology, and culture to be supervised and guided by R2i2 faculty/staff.

Innovation Incubator:

Selected students (selection based on presentation and quality rubric) will be able to have their ideas, inventions (or innoventions) brought to reality by working with one another and by receiving direct support from R2i2 faculty and staff.

R2i2 Business Ventures:

Select students will be given a unique opportunity to learn how to run a business by actually running a business. The entrepreneurship skills learned in this program will be applicable to any career focus. Life lessons of adapting to circumstances, working with a diverse group of people, and thinking with a growth mind-set apply to any field.
Potential evening programming will include classes open to students and community members that offer certifications upon completion. A possible example is Six Sigma certification/belts.
